Notice:

1. After the plant location is confirmed, system will confirm the region, coordinate, currency and time zone automatically.
2. System type includes All on Grid, Self-consumption, Energy Storage System. Different system type has different plant view. Please select the system type according to actual situation.
3. Capacity is a required field. Please enter the accurate capacity.

4. Add a Gateway/Logger

Please enter gateway/logger SN belongs to the plant. System will count data according to gateway/logger and its sub-device.

4.1 After entering the plant info, click save. Then go to **【Add a New Gateway/Logger】**

4.2 Go to 【New Gateway/Logger List】 and click 【+】 in the upper-right corner.

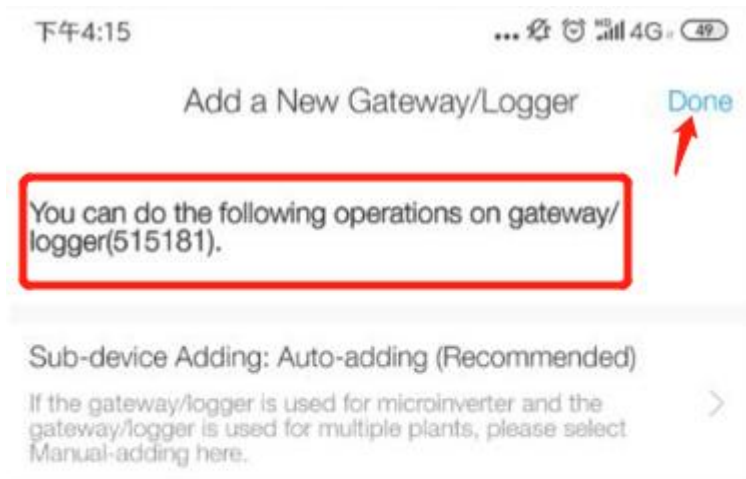

4.3 Scan bar code/QR code of gateway/logger here.

**Notice:**

- If you cannot find gateway/logger SN, please click 【?】 in the upper-right corner.
- If there is no bar code/QR code or the bar code/QR code is broken, please go to Enter SN】 in the lower-left corner.
- If it is in low-light conditions, please click 【Turn on Flashlight】 .

4.4 After scanning the gateway/logger SN, click **【Done】** to finish.

5. Plant Created

After adding a gateway/logger and authorizing a plant, back to the page below.

Click **【Done】** in the upper-right corner. System will go to Plant Details

automatically. If the gateway and its sub-device are networked, users can check the data around 10 mins.
